

Créer son vote électronique

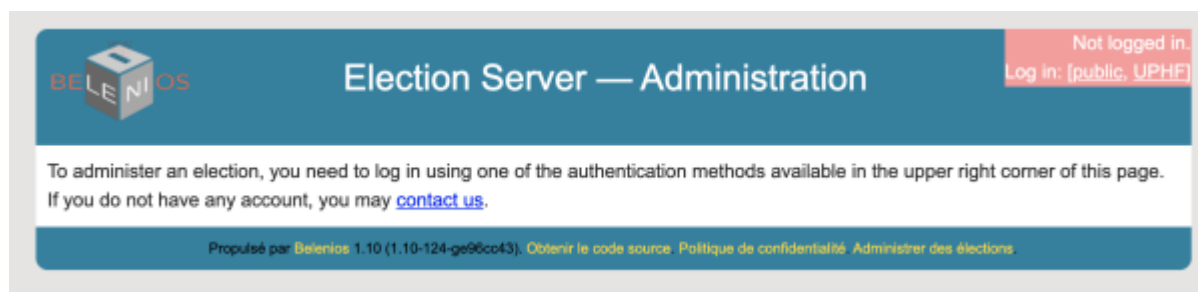

Les différentes étapes de la création d'un vote

Lors de votre connexion sur l'interface de création de vote, il vous est demandé de valider la politique de gestion des données personnelles.

Vous pouvez ensuite cliquer sur le lien UPHF en haut à droite de la fenêtre:

Après votre connexion réussi à la plateforme via le système SSO CAS de l'ENT vous accéder au tableau de bord de belenios:

The screenshot shows the administration interface of the BELENIOS Election Server. The header includes the BELENIOS logo, the title "Election Server — Administration", and a user status bar indicating "Logged in as UPHF:ffarenea" with a "Log out" link. The main content area is divided into four sections, each with a heading and a message: "Prepare a new election" (with a link), "Elections being prepared", "Elections you can administer", and "Tallied elections", all stating "You own no such elections!". A fourth section, "Archived elections", also states "You own no such elections!". The footer contains version information: "Propulsé par Belenios 1.10 (1.10-124-ge96cc43). Obtenir le code source. Politique de confidentialité. Administrer des élections."

Après avoir cliqué sur **“Prepare a new election”**, validez les configurations par défaut:

The screenshot shows the configuration page for "Prepare a new election". The header includes the BELENIOS logo, the title "Prepare a new election", and a user status bar indicating "Logged in as UPHF:ffarenea" with a "Log out" link. The main content area is divided into two sections: "Credential management (more info)" and "Authentication". Under "Credential management", there are two radio buttons: "Automatic (degraded mode - credentials will be handled by the server)" (selected) and "Manual (safe mode - a third party will handle the credentials)". Under "Authentication", there are two radio buttons: "Password (passwords will be emailed to voters)" (selected) and "CAS (external authentication server), server address: [input field] (for example: https://cas.inria.fr/cas)". A "Proceed" button is located at the bottom left. The footer contains version information: "Propulsé par Belenios 1.10 (1.10-124-ge96cc43). Obtenir le code source. Politique de confidentialité. Administrer des élections."

Remplissez les différents champs et cliquez sur **“save change”** au niveau de chaque item:

Preparation of election CoS #1

Logged in as *UPHF:ffarenea*. [Log out.](#)

Name and description of the election

Name of the election:

Description of the election:

Public name of the administrator

Public name of the administrator:

This name will be published on the election result page.

Languages

Languages: (Available languages: en fr de ro it)

This is a space-separated list of languages that will be used in emails sent by the server.

Contact

Contact:

This contact will be added to emails sent to the voters.

Descendez ensuite dans l'interface pour accéder à **“Edit questions”**:

Remplissez votre vote comme par exemple:

Questions for election CoS #1

Logged in as UPHF:farenea. [Log out.](#)

Alternative voting methods (warning, still experimental):
You may wish voters to rank candidates or give each candidate a score. This allows deciding the winner according to your favorite counting method (e.g. Condorcet, STV, majority judgement).
Note that:
1. the after-the-vote procedure will require more steps;
2. you will be given the raw results (shuffled list of ballots) and you will need to apply your counting method yourself.
 Tick the box to activate this mode.

Question: [Remove](#) [Insert](#)

The voter has to choose between and answers.

Blank vote is allowed
